## PROJECTS

### Portfolio Website

- Made using HTML, CSS, JavaScript, NodeJS
- A portfolio website that has all my details and info regarding the skills I possess, projects that I had worked on, education details and contact information.
- Live Link: <http://yashgarg-portfolio.herokuapp.com/>

### TextUtils

- Made using HTML, CSS, JavaScript, ReactJS
- TextUtils is a web based utility application that has some text formatting tools like converting uppercase to lowercase and vice versa, copy texts, words and characters counter, extra space removing and many more to come in future.
- Live Link: <https://yashgarg4.github.io/TextUtils-React/>

### News Express

- Made using HTML, CSS, JavaScript, ReactJS and News API key.
- NewsExpress is react based web application that fulfills your daily dose of latest news around the globe. It runs on localhost because of API key limitation.
- GitHub Link: <https://github.com/yashgarg4/newsapp>

### iNoteBook

- Made using HTML, CSS, JavaScript and MERN (MongoDB, ExpressJS, ReactJS and NodeJS) stack.
- It is a notes storing full stack web application that helps users to store their data on cloud database.
- GitHub Link: <https://github.com/yashgarg4/inotebook>

### Business-Card Template

- Made using HTML, CSS, JavaScript and NodeJS.
- This Website can be used to create and design Business Card templates.
- Live Link: <https://yashgarg4.github.io/business-card/>
